

Visitors' report – amended approval process for independent prescribing programmes

Contents

Section one: Programme details.....	1
Section two: Executive summary.....	1
Section three: Submission details.....	2
Section four: Additional documentation	2
Section five: Recommendation of the visitors.....	2
Section six: Visitors' comments	3

Section one: Programme details

Name of education provider	Glyndwr University
Programme name	Professional Certificate (Practice Certificate In Independent and Supplementary Prescribing for AHP's at level 7)
Mode of delivery	Part time
Relevant entitlements	Independent prescribing Supplementary prescribing
Name of HCPC visitors and visitor role	Alison Wishart (Chiropodist / podiatrist) Gemma Quinn (Independent prescribing)
HCPC executive	Hollie Latham
Date of submission to the HCPC	22 October 2014

Section two: Executive summary

The Health and Care Professions Council (HCPC) approve education programmes in the UK which health and care professionals must complete before they can apply to be registered with us.

As well as approving educational programmes for individuals who want to join the Register, the HCPC approve programmes for those already on the Register.

Along with several other entitlements, we currently approve programmes to allow:

- chiropodists / podiatrists, radiographers and physiotherapists to have their registration record annotated with supplementary prescribing; and
- chiropodists / podiatrists and physiotherapists to have their registration record annotated with independent prescribing.

We have previously ensured that currently running supplementary prescribing programmes at this education provider have met the standards of education and training (SETs). As this new or amended programme is based on an existing HCPC approved supplementary prescribing programme, we can be satisfied that it meets some of the standards for prescribing, which are based on the SETs. However, we have identified some standards where we will need to make a judgement about how the introduction or modification of elements of the programme impact on the way it meets these standards.

To recommend a programme for approval, the visitors must be assured that the programme meets the standards for education providers part of the standards for prescribing, and that those who complete the programme demonstrate an ability to meet the standards for all prescribers (along with the additional standards for independent prescribers where required).

Section three: Submission details

The following required documents were provided as part of the submission:

- Information for applicants (eg advertising materials, admissions / entry criteria)
- Programme specification
- Student handbook
- Information about programme and management team structure, including staff CVs
- Module descriptors
- Extracts from practice placement documents
- Extracts from assessment regulations relating to student progression and external examiners
- Standards for prescribing mapping document

Section four: Additional documentation

- The visitors agreed that no further documentation was required in order to make a recommendation.
- The visitors agreed that additional documentation was required in order to make a recommendation. The standards for which additional documentation is requested are listed below with reasons for the request.

Section five: Recommendation of the visitors

The visitors agreed to recommend to the Education and Training Committee that:

- There is sufficient evidence to show the programme meets the standards for education providers part of the standards for prescribing, and therefore that the programme be approved
- There is insufficient evidence to determine if or how the programme meets the standards for education providers part of the standards for prescribing.

Therefore, a visit is recommended to gather more evidence, and if required place conditions on approval of the programme

Section six: Visitors' comments

The visitors noted that, at present, there were no (Allied Health Professionals) AHPs listed as part of the teaching staff on this module. Whilst the documentation does include reference and acknowledgement of the differing learning needs of the various professions eligible for this course, and of seeking expert input, the visitors feel that consideration should be given to incorporating AHPs into the core teaching team to improve the knowledge and learning experience of the students.
