

Our webinars on scope of practice and delegation

Education and Training Committee

Wednesday 4 June 2025

A reminder of our key messages on advanced practice

All HCPC registrants working at an advanced level are already fully regulated and must meet all of their HCPC standards which are relevant to their scope.

All of our registrants must do CPD and their CPD should reflect their scope of practice

Webinars

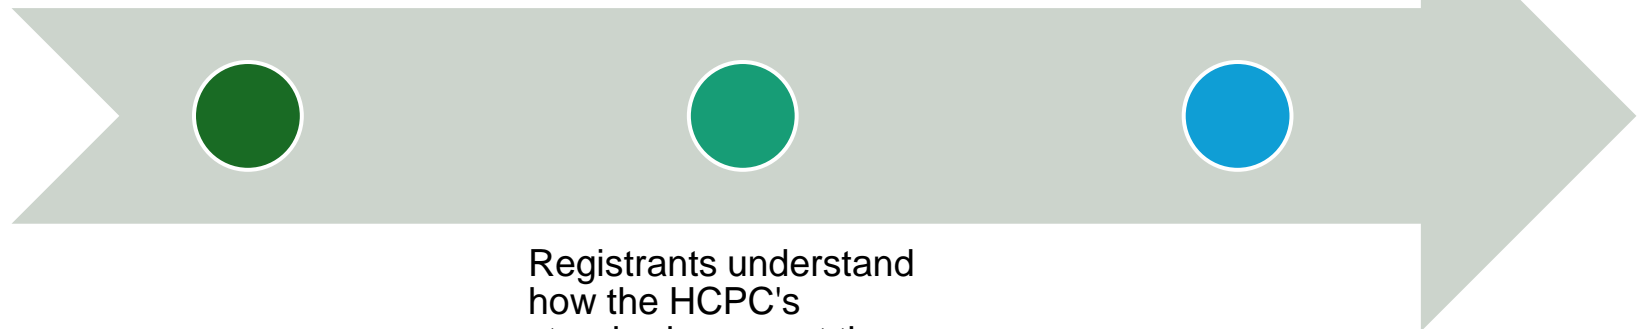

At our last professional body meeting we discussed our plans to deliver a series of webinars for registrants, employers and managers of HCPC registrants. We are very pleased to have received funding from NHSE to undertake this work across the UK. These webinars will:

- Focus on delegation for professionals who are part of the support workforce, in line with the ambitions of the LTWfP.
- Address key misconceptions about delegation (such as delegation only being possible to another professional working in the same role as you).
- Explain the HCPC's expectations of registrants working at a level described as advanced practice.
- Promote the HCPC's support materials for registrants working at an advanced level to continue to meet HCPC standards.

Webinar Objectives & Next Steps

Registrants will come away with confidence knowing how to meet the Standards when working in an advanced role and be able to work to the limits of their knowledge, skills and experience.

Develop online materials, including case studies and other resources to help registrants and employers fully understand the complex issues of delegation and scope of practice.

Registrants understand how the HCPC's standards support them in any roles within their scope of practice.
